Building Energy Rating Certificate

This certificate records the Building Energy Rating for 34 Bayly. The rating reflects the building fabric, the air source heat pump and the mechanical ventilation with heat recovery system working together.

ENERGY RATING	A2
FLOOR AREA	118 square metres
PRIMARY HEATING	air source heat pump
VENTILATION	MVHR, continuous

Advisory notes

- An A2 rating places this home among the most efficient in its class when the systems are operated as intended.
- Running the heat pump steadily and keeping the ventilation on protects both comfort and the rating in practice.
- The full advisory report lists measures to maintain performance over the life of the home.
