FIRE SAFETY

Fire Safety and Evacuation

This document sets out the fire safety provisions for 34 Bayly and what to do in the event of a fire. Read it with everyone in the household and agree your escape plan.

Detection

- Smoke and heat alarms are fitted and interlinked. Test them monthly using the test button.
- Do not remove or disconnect any alarm. Report a faulty alarm immediately.

Your escape plan

- Agree a primary route out and a second route in case the first is blocked.
- Keep escape routes clear and keys where everyone can find them.
- Once out, stay out, and call the emergency services from a safe place.

Fire doors

Where fire doors are fitted, keep them closed and never wedge them open. They are there to hold back smoke and give you time to leave safely.
