HANDOVER

Homeowner Manual

Welcome to your new home at 34 Bayly. This manual is the place to start. It explains how the home works, who to contact for aftercare, and how the defects liability period operates so you know what is covered and how to report anything that needs attention.

Your first week

- Locate the consumer unit, the water stopcock and the heating controls. Their positions are marked on your floor plans.
- Leave the ventilation system running. It is designed to run continuously and keeps the air healthy and the fabric protected.
- Run the heat pump low and constant rather than in short bursts. This is the most efficient way to heat the home.

Defects liability period

Your home is covered by a defects liability period from the date of handover. During this time, defects in workmanship or materials will be put right at no cost to you. Report any issue through the OpenHouse portal and it is logged, tracked and routed to the right team.

AFTERCARE CONTACT	aftercare via the OpenHouse portal
COVER	structure, services and finishes
